# RHINO GUARD 9" SLEEVE

RHINO GUARD™ is highly engineered textile composite primarily designed to provide the highest levels of protection against a wide range of puncture hazards. The material is constructed from an innovative combination of advanced fibres, modified fabric structure and a unique coating technology to deliver high levels of protection against both large and small puncture threats (including needles and syringes).

Uniquely for a puncture resistant material, RHINO GUARD™ also provides protection against cuts, heat and flame, abrasion and liquids. All of this is achieved in a lightweight, thin and flexible material which can be employed in a range of demanding environments.

The 19" SLEEVE provides all the performance of RHINO GUARD™ in a full length sleeve providing protection to the wrist, forearm, elbow and bicep areas for handling large sheet materials which offer potential cut and puncture hazards. A series of pleats to the elbow area means no restriction of movement and a thumb slot and clip fastening ensure a secure fit. As the RHINO GUARD™ fabric provides liquid protection the sleeve is ideal for glass handling, metal forming, waste management and recycling.

## Features and Benefits

- > EN388 Level 5 Cut Resistance
- > EN388 Level 4 Abrasion Resistance
- > EN388 Level 4 Puncture Resistance
- > ASTM F1342-05 : 86 Newtons of puncture resistance
- > ASTM F1342-05 (modified) needle test : 4.1 Newtons
- > CPPT 1554 grams Cut Resistance
- > Double width velcro fastening for secure fit
- > Liquid protection
- > Fire resistant

## Applications

- Emergency Services
- Military
- Metal forming and handling
- Glass Processing and handling
- Security
- Local Authorities

## Packaging

- Packed per pair
- 20 pairs per case
